

PCMO
Project & Contracts Management Organisation

PCMO Lessons Learned Workshop Guide

70-PAGE PROFESSIONAL GUIDE

1. Workshop Design: Participant Selection

This guide explains how participant selection supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why participant selection is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for participant selection.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat participant selection as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

2. Workshop Design: Session Agenda

This guide explains how session agenda supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why session agenda is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for session agenda.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat session agenda as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

3. Workshop Design: Data Collection

This guide explains how data collection supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why data collection is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for data collection.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat data collection as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

4. Workshop Design: Facilitation Prompts

This guide explains how facilitation prompts supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why facilitation prompts is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for facilitation prompts.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat facilitation prompts as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

5. Workshop Design: Root Cause Analysis

This guide explains how root cause analysis supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why root cause analysis is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for root cause analysis.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat root cause analysis as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

6. Workshop Design: Action Ownership

This guide explains how action ownership supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why action ownership is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for action ownership.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat action ownership as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

7. Workshop Design: Knowledge Capture

This guide explains how knowledge capture supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why knowledge capture is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for knowledge capture.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat knowledge capture as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

8. Workshop Design: Lessons Register

This guide explains how lessons register supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why lessons register is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for lessons register.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat lessons register as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

9. Workshop Design: Continuous Improvement

This guide explains how continuous improvement supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why continuous improvement is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for continuous improvement.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat continuous improvement as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

10. Workshop Design: Stakeholder Engagement

This guide explains how stakeholder engagement supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why stakeholder engagement is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for stakeholder engagement.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat stakeholder engagement as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

11. Workshop Design: Decision Log

This guide explains how decision log supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why decision log is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for decision log.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat decision log as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

12. Workshop Design: Risk Feedback

This guide explains how risk feedback supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why risk feedback is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for risk feedback.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat risk feedback as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

13. Workshop Design: Post-Workshop Review

This guide explains how post-workshop review supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why post-workshop review is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for post-workshop review.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat post-workshop review as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

14. Preparation: Organisational Learning

This guide explains how organisational learning supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why organisational learning is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for organisational learning.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat organisational learning as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

15. Preparation: Workshop Objectives

This guide explains how workshop objectives supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why workshop objectives is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for workshop objectives.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat workshop objectives as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

16. Preparation: Participant Selection

This guide explains how participant selection supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why participant selection is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for participant selection.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat participant selection as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

17. Preparation: Session Agenda

This guide explains how session agenda supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why session agenda is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for session agenda.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat session agenda as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

18. Preparation: Data Collection

This guide explains how data collection supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why data collection is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for data collection.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat data collection as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

19. Preparation: Facilitation Prompts

This guide explains how facilitation prompts supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why facilitation prompts is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for facilitation prompts.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat facilitation prompts as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

20. Preparation: Root Cause Analysis

This guide explains how root cause analysis supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why root cause analysis is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for root cause analysis.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat root cause analysis as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

21. Preparation: Action Ownership

This guide explains how action ownership supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why action ownership is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for action ownership.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat action ownership as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

22. Preparation: Knowledge Capture

This guide explains how knowledge capture supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why knowledge capture is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for knowledge capture.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat knowledge capture as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

23. Preparation: Lessons Register

This guide explains how lessons register supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why lessons register is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for lessons register.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat lessons register as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

24. Preparation: Continuous Improvement

This guide explains how continuous improvement supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why continuous improvement is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for continuous improvement.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat continuous improvement as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

25. Preparation: Stakeholder Engagement

This guide explains how stakeholder engagement supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why stakeholder engagement is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for stakeholder engagement.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat stakeholder engagement as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

26. Preparation: Decision Log

This guide explains how decision log supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why decision log is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for decision log.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat decision log as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

27. Preparation: Risk Feedback

This guide explains how risk feedback supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why risk feedback is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for risk feedback.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat risk feedback as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

28. Facilitation: Post-Workshop Review

This guide explains how post-workshop review supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why post-workshop review is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for post-workshop review.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat post-workshop review as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

29. Facilitation: Organisational Learning

This guide explains how organisational learning supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why organisational learning is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for organisational learning.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat organisational learning as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

30. Facilitation: Workshop Objectives

This guide explains how workshop objectives supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why workshop objectives is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for workshop objectives.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat workshop objectives as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

31. Facilitation: Participant Selection

This guide explains how participant selection supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why participant selection is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for participant selection.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat participant selection as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

32. Facilitation: Session Agenda

This guide explains how session agenda supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why session agenda is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for session agenda.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat session agenda as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

33. Facilitation: Data Collection

This guide explains how data collection supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why data collection is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for data collection.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat data collection as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

34. Facilitation: Facilitation Prompts

This guide explains how facilitation prompts supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why facilitation prompts is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for facilitation prompts.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat facilitation prompts as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

35. Facilitation: Root Cause Analysis

This guide explains how root cause analysis supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why root cause analysis is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for root cause analysis.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat root cause analysis as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

36. Facilitation: Action Ownership

This guide explains how action ownership supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why action ownership is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for action ownership.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat action ownership as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

37. Facilitation: Knowledge Capture

This guide explains how knowledge capture supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why knowledge capture is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for knowledge capture.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat knowledge capture as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

38. Facilitation: Lessons Register

This guide explains how lessons register supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why lessons register is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for lessons register.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat lessons register as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

39. Facilitation: Continuous Improvement

This guide explains how continuous improvement supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why continuous improvement is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for continuous improvement.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat continuous improvement as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

40. Facilitation: Stakeholder Engagement

This guide explains how stakeholder engagement supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why stakeholder engagement is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for stakeholder engagement.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat stakeholder engagement as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

41. Facilitation: Decision Log

This guide explains how decision log supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why decision log is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for decision log.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat decision log as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

42. Evidence Capture: Risk Feedback

This guide explains how risk feedback supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why risk feedback is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for risk feedback.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat risk feedback as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

43. Evidence Capture: Post-Workshop Review

This guide explains how post-workshop review supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why post-workshop review is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for post-workshop review.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat post-workshop review as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

44. Evidence Capture: Organisational Learning

This guide explains how organisational learning supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why organisational learning is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for organisational learning.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat organisational learning as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

45. Evidence Capture: Workshop Objectives

This guide explains how workshop objectives supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why workshop objectives is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for workshop objectives.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat workshop objectives as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

46. Evidence Capture: Participant Selection

This guide explains how participant selection supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why participant selection is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for participant selection.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat participant selection as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

47. Evidence Capture: Session Agenda

This guide explains how session agenda supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why session agenda is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for session agenda.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat session agenda as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

48. Evidence Capture: Data Collection

This guide explains how data collection supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why data collection is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for data collection.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat data collection as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

49. Evidence Capture: Facilitation Prompts

This guide explains how facilitation prompts supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why facilitation prompts is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for facilitation prompts.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat facilitation prompts as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

50. Evidence Capture: Root Cause Analysis

This guide explains how root cause analysis supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why root cause analysis is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for root cause analysis.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat root cause analysis as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

51. Evidence Capture: Action Ownership

This guide explains how action ownership supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why action ownership is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for action ownership.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat action ownership as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

52. Evidence Capture: Knowledge Capture

This guide explains how knowledge capture supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why knowledge capture is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for knowledge capture.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat knowledge capture as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

53. Evidence Capture: Lessons Register

This guide explains how lessons register supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why lessons register is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for lessons register.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat lessons register as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

54. Evidence Capture: Continuous Improvement

This guide explains how continuous improvement supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why continuous improvement is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for continuous improvement.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat continuous improvement as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

55. Evidence Capture: Stakeholder Engagement

This guide explains how stakeholder engagement supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why stakeholder engagement is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for stakeholder engagement.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat stakeholder engagement as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

56. Analysis: Decision Log

This guide explains how decision log supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why decision log is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for decision log.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat decision log as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

57. Analysis: Risk Feedback

This guide explains how risk feedback supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why risk feedback is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for risk feedback.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat risk feedback as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

58. Analysis: Post-Workshop Review

This guide explains how post-workshop review supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why post-workshop review is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for post-workshop review.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat post-workshop review as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

59. Analysis: Organisational Learning

This guide explains how organisational learning supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why organisational learning is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for organisational learning.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat organisational learning as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

60. Analysis: Workshop Objectives

This guide explains how workshop objectives supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why workshop objectives is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for workshop objectives.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat workshop objectives as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

61. Analysis: Participant Selection

This guide explains how participant selection supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why participant selection is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for participant selection.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat participant selection as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

62. Analysis: Session Agenda

This guide explains how session agenda supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why session agenda is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for session agenda.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat session agenda as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

63. Analysis: Data Collection

This guide explains how data collection supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why data collection is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for data collection.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat data collection as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

64. Analysis: Facilitation Prompts

This guide explains how facilitation prompts supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why facilitation prompts is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for facilitation prompts.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat facilitation prompts as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

65. Analysis: Root Cause Analysis

This guide explains how root cause analysis supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why root cause analysis is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for root cause analysis.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat root cause analysis as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

66. Analysis: Action Ownership

This guide explains how action ownership supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why action ownership is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for action ownership.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat action ownership as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

67. Analysis: Knowledge Capture

This guide explains how knowledge capture supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why knowledge capture is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for knowledge capture.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat knowledge capture as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

68. Analysis: Lessons Register

This guide explains how lessons register supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why lessons register is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for lessons register.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat lessons register as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.

69. Analysis: Continuous Improvement

This guide explains how continuous improvement supports a structured lessons learned workshop that converts project experience into reusable organisational knowledge. Adapt it to project scale, risk, contract terms, governance, and applicable law.

Purpose

Define why continuous improvement is needed, the decision it supports, and the accountable workshop owner.

Recommended practice

Document the current position, validate inputs, consult participants, agree the session approach, and retain evidence for continuous improvement.

Control checklist

Confirm objectives; assign a facilitator; select participants; set the agenda; collect evidence; analyse causes; agree actions; assign owners; report outcomes.

Questions for the team

What really happened? What went well? What should change? Which evidence is reliable? Who owns the improvement actions? How will we know it worked?

Practical takeaway

Treat continuous improvement as a living workshop control. Review it when facts, risk exposure, delivery conditions, or contractual obligations change.
